Do you know...

THAT KITES HAVE MILITARY USES?

Kites have been used by the Army and Navy for carrying up flags, lamps or semaphores... and for floating torpedoes on hostile positions. In aerial photography, kites have carried cameras to a considerable height to obtain a bird's-eye view of enemy fortifications.

THESE SAFETY RULES FOR MODERN KITE-FLYERS?

1. Fly kites in open fields, away from power lines and other overhead obstructions.
2. Never use wire, tinsel or metallic string.
3. Be sure the string is perfectly dry.
4. If the kite catches in a power line, let go immediately. Don't pull! Phone the company owning the line, and a lineman will come to get your kite for you.
